Reading Challenge at SAI

A child's reading skills are important to their success in school and work. In addition, reading can be a fun and imaginative activity for children, which opens doors to all kinds of new worlds for them. Reading and writing are important ways we use language to communicate.

To foster this wonderful habit of reading in children, British Council along with SAI International School organized 'Reading Challenge'

from the 17th to 20th of April for children between the age group of 6-14 years. The British Council has organized the Challenge for the second successive year at SAI International School after its success in April 2011. The Reading Challenge is an immensely popular and successful reading initiative running in UK libraries and schools. This program works in association with The Reading Agency, an organization urging and inspiring people to read more

After a month of reading one book a week, the program culminated in workshops challenging students on their Computer knowledge by engaging them on the British Council online learning website. All the books were sent from the British Council library, Kolkata. "Each book has been hand selected from our partner libraries in UK making them unique to Indian audiences", said Aparna Bhattacharya, Manager Young Audiences, British Council.

The final day of The Reading Challenge, 20th of April saw Ms. Aparna Bhattacharya present the Certificate of Participation to the young kids. Achievers of the Challenge received a medal for their feat. The parents of the participants applauded their children as they went to the stage to receive their certificates.

During this four day long challenge, children have had the fun of

reading books and also indulge in activities like writing book reviews, making an environment brochure, character sketches, speaking, online activities and a wildlife quiz.

At SAI International School we have always accepted new ideas to give an additional edge to our students and this is yet another effort of to incorporate International dimensions to our curricula.
